

NHS Innovation Accelerator

The NHS Innovation Accelerator (NIA) aims to help create conditions and cultural change to enable proven innovations to be adopted faster and more systematically, delivering practical examples for patient and population benefit. 17 Fellows in the NIA's first year cohort received support to scale innovations across the NHS.

Overcoming barriers

NIA in numbers

First year cohort by May 2017...

This infographic presents the findings of an evaluation of the NHS Innovation Accelerator, conducted by the Institute for Employment Studies, York Health Economics Consortium and the University of Liverpool Department of Health Sciences. The evaluation was funded by The Health Foundation and covered the first cohort of the NIA (launched in July 2015), which was funded by NHS England, the Health Foundation and five Academic Health Science Networks. The core NIA programme is hosted at UCLPartners. The NIA is an NHS England initiative delivered in partnership with the Country's 15 Academic Health Science Networks (AHSNs).
